

Extension Home Maintenance

Shampooing

- It is recommended that you gently brush and take out any tangles before shampooing your hair. Always hold the hair when brushing and avoid putting any stress on the attachments.
- Shampoo hair 1-2 times per week.
- Shampoo hair in a gentle manner, following the direction of the hair flow.
- Using a sulfate/sulfur-free product, gently shampoo with your head tilted back (not forward) gently moving the the shampoo from your scalp to the bottom of the hair. Do not massage/scrub the hair extensions, it will cause matting and tangling. Rinse with warm water, and squeeze out excess water, and wrap hair in a towel. Do not use a scrubbing motion to dry the hair. Always dry the base of your extensions.
- Condition hair from the midsection to the ends.

Brushing & Styling

- Use sulfate free products to keep the longevity of the hair.
- Use a wide-tooth comb to detangle the hair starting at the tips, working your way to the scalp.
- Use the recommended hair extension brush
- Lift each weft to ensure proper brushing to prevent matting towards the middle of your head.
- Do not put direct stress on the top of the extensions. When using a blow dryer, flat iron, etc. do not put direct heat on the bonds.
- Wear hair in low ponytail to prevent pulling and tension.

Other Recommendations

- Brush hair a couple of times a day to ensure there is no tangling.
- Never go to bed with wet hair. Always make sure your hair is dry and tied back in a loose ponytail, pigtails, or braids before going to sleep.
- Sunscreen can cause the extensions to turn pink. ALWAYS use a mineral sunscreen, free of avobenzone.
